

Establishing the fundamentals: Machine Learning

		<p><i>Similarity:</i> social behavior</p> <p><i>Stigmergy:</i> insect coordination mechanism</p>	
<p><i>Clumping:</i> bentonite</p>	<p><i>Marking:</i> bee exposes gland to release pheromone</p>		
		<p><i>Adaptation:</i> mice's local evolution</p>	<p><i>Receptive Field (architectural pattern):</i> photoreceptor</p>
<p><i>Activation:</i> neural networks</p>	<p><i>Trailing:</i> termites mound</p>		

November 12, 2019 – Pisa, Congress Center Le Benedettine

Mario G.C.A. Cimino (mario.cimino@unipi.it)
